### UI EXPERIENCE

#### Project: 1

Client : Eduloans  
Technology : AngularJS  
Platform : Web and Mobile

**Abstract:**

*The aim of the client was to create a Web portal for students who were planning to pursue studies abroad in countries like USA, Germany, France, Canada, Australia, etc. This portal will help students select colleges which is available according to their eligibility and their choices of interests.*

**Roles & Responsibilities**

- Implemented angular routing for navigation w.r.t to views.
- Developed views for displaying Charts which were uploaded from admin in backend.
- Created necessary UIs for the respective view as provided by the client.
- Channeled data for admins and students accordingly with routing.
- Developed the front-end web page by using HTML5, CSS3, and Angular JS

**Project: 2**

Client : XpandrAI  
Technology : Nextjs  
Platform : Web/Mobile

**Abstract:**

*The project's aim was to create AI based campaign system for marketing with data provided by the user. Here we use AI and give the campaign type with keywords which will generate the content and images from openAi and we select the apps where we want to run the campaign, for example we have used Whatsapp, SMS, Email, LinkedIn, Telegram and Instagram for the campaign purpose. Once the user is satisfied with the content he will publish it with time and date. There by database executes the campaign at the selected time and campaign will be made public on different social media platforms.*

**Roles & Responsibilities**

- Generated components and views for various pages that were required for the app
- Implemented plug-ins to extend application functionality.
- Developed the user interface with Nextjs, RestAPI, TailwindCSS.
- Performed multiple assignments under pressure and consistently met deadlines given.

**Project: 3**

Client : Jackpot Villa  
Technology : NextJs  
Platform : Web and Mobile

**Abstract:**

*A gaming aggregator, focused on developing an online casino platform for Asian and European markets. Our aim to design and develop online gaming platform for both web and mobile platforms.*

**Roles & Responsibilities**

- Developed the user interface with NextJs and Tailwind CSS.
- Styled content and website layout for the user using NextJs.
- Implemented Page Optimization techniques for web pages, best Practices in Javascript and handled Cross Browser compatibility issues in web pages.

**Project: 4**

Client : Zifipay  
Technology : React-Native.  
Platform : Mobile.

**Abstract:**

*The project's aim was to create a crypto trading wallet, where customers could signup, buy and sell and view the latest prices of crypto coins.*

**Roles & Responsibilities**

- Designed and Developed views using Adobe XD.
- Developed the UI with react-native.
- Styled content for apps using latest available modules.
- Performed multiple assignments under pressure and consistently met deadlines given.
- Installed and created views with various node packages like App Intro sliders and progressSteps.

**Project: 5**

Client : Foodcita  
Technology : React-Native.  
Platform : Mobile.

**Abstract:**

*The project's aim was to create a rate and review portal for restaurants and stalls in any area.*

**Roles & Responsibilities**

- Developed the UI with react-native.
- Styled content for apps using latest available modules.
- Performed multiple assignments under pressure and consistently met deadlines given.
